Zlatka Ognjanovica 44, 37000, Krusevac, Serbia

About me:
Web Developer who, if had enough money in his life, would write code for free.

WORK EXPERIENCE

JAVASCRIPT ENGINEER (REACT, REACT NATIVE)

- Developing proptech applications using React.Js and React Native,
- Building user interfaces for a whole range of client's products,
- Writing unit and integration tests with Jest to test React components,
- Reviewing pull requests,
- Developing and maintaining web applications that will be launched on multiple platforms such as Android or iOS,
- Producing clean, efficient code based on specifications,
- Gather and evaluate client's feedback,
- Developing new user-facing features using React and React Native, Building reusable components and front-end libraries for future use,
- Daily communication with clients, Attending daily stand-up meetings, retros, and grooming sessions,
- Developing and maintaining a shared code library for the web and mobile projects.

FRONTEND DEVELOPER

- Responsible for the translation of UI/UX design wireframes to actual code,
- Building dynamic, scalable and responsive web sites with React.Js, Vue.Js and jQuery,
- Improving user experience by converting regular web sites into Progressive Web Apps,
- Communicating with server side using http service,
- Implementation of high quality web based enterprise applications,
- Daily communication with clients, Attending daily stand-up meetings,
- Implementing cross-browser optimization, even for IE,
- Implementing appropriate search engine optimization for improving the quality and quantity of website traffic,
- All projects are created with TYPO3 CMS, so writing scalable and maintainable code is a must,
- As a TYPO3 CMS Integrator i'm developing templates for websites,
- creating content elements and configuring all the necessary extensions and plugins,
- I'm also working on few projects as Backend developer where i was in charge of maintaining existing code.

INTERNSHIP PROGRAM, FRONTEND WEB DEVELOPMENT

- PSD to HTML Workflow, building from scratch, Implementing the most effective solutions in building web sites,
- Building dynamic user interface, Attending various meetings,
- Implementation of data obtained from web api source code of many different web sites. (Communication with server side by using http requests.)
